

Have you been admitted to hospital with an **asthma attack**?

This hospital is involved in a national project to help make the care of patients with asthma better.

This project, which started in November 2018, **collects information about people admitted to this hospital with an asthma attack.** This includes confidential information.

This project is called the **National Asthma and COPD Audit Programme (NACAP).**

The information collected will be used to help improve asthma care for patients.

For more information about the project or how to opt-out, please ask a member of the hospital team for an information leaflet.
