

## Has your child been admitted to hospital with an **asthma attack**?

**This hospital is taking part in a project to help make asthma care better.**

From **June 2019 until at least February 2021**, we will collect information about **children and young people that come to this hospital** with an asthma attack. This includes confidential information.

This project is called the **National Asthma and COPD Audit Programme (NACAP)**.

The information will be used to help improve asthma care for children and young people.

For more information about the project or how to opt-out, please ask a member of the hospital team for an information leaflet.
